
The Data Viz of NYC Traffic

Handwritten note in the bottom left corner:

1. The device is a radio receiver.
2. It is a vacuum tube radio.
3. It is a portable radio.
4. It is a radio receiver.
5. It is a radio receiver.

Why is the NYC subway schedule unreliable?

A photograph of a man in a blue shirt and a dark cap with a red stripe, sitting at a control console. He is looking at a computer monitor and using a joystick. The console is cluttered with various electronic devices, including a blue oscilloscope and a keyboard. In the background, there are large racks of electronic equipment with many glowing lights and switches. The room appears to be a control room or a laboratory from a past era.

Decades of disinvestment

Overcrowding

Track Fires

The MTA has proposed a few ways to fix these issues.

The process of collecting data and coding

Next steps

To-dos from the last user testing session

Item	Priority	
Show one subway line at once (check box)	2	
Restrain the coverage of map	3	
Show less info if zoom out	3	
Escape button	4	
Performance/lag	1-1	O
simplify taxi route	1-1	O
Train location	1-2	O
Time display	1-3	
Different colors for different speed of taxi	1-4	O
Info layer (station name)	2?	
Subway station icon	1	O
